

Supplementary Table 2. The International Bone Metastases Consensus Group criteria

Response	Criteria of evaluation
Complete response	Pain reduction by two scores or more to zero and OMED stable or reduced
Partial response	Pain reduction by two scores or more and OMED stable or reduced
Stable disease	Pain increase by two scores or more and OMED stable or increased
Progressive disease	No change in pain and OMED increased by 25% or more (or start of morphine use after baseline)
	Stable pain and stable OMED

OMED, oral morphine equivalent dose.
